WE HAVE MORE THAN
50 YEARS OF EXPERIENCE
DELIVERING TURNKEY
PROJECTS IN THE LOGISTICS,
PACKING AND STORAGE
SECTOR.

WHO WE ARE?

The **Imeguisa group** has a wide technical and industrial experience, which is the reason behind its ability to provide specialist logistics and storage solutions which meet the requirements of the most demanding of our customers.

Our experience includes major complex projects for production and assembly lines as well as the design of equipment for warehousing and manufacture. We always seek to make the most of the space available and its functional nature.

We provide global, intra-logistics turnkey project development services.

Imeguisa (Portugal) - Indústrias Metálicas Reunidas, S.A. forms a part of the **Imeguisa Group**, which is based in the North of Spain and has accumulated over 50 years experience and is now expanding overseas with manufacturing and warehouse facilities in Europe, North America and North Africa.

Imeguisa (Portugal) is managed using an Integrated Management System for quality, the environment and safety in accordance with ISO 9001 and, in implementation, ISO 14001 regulated and certified by **TUV Rheinland**.

In all of our actions we are seeking customer satisfaction. Our employees are the quality tools which make it possible to successfully rise to the challenges which we come up against every day on the basis of an ethical approach and dedication, binding together a partnership commitment which puts us in the position of being a solution rather than an option.

ModulPipeTransport-system

I-Frames & Platforms

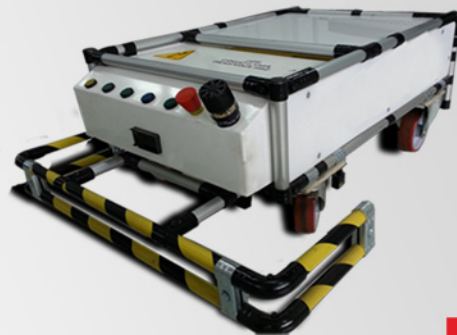

A simple solution which is versatile and functional and optimises the handling, transport and distribution of loads in the warehouse or on the production line.

Modul**Move**-system

AGV - Automatic Guided Vehicle

An automatic and intelligent system for the distribution of components or finished products on pre-programmed circuits, in warehouses and production lines.

SHOPSTOCK

A system where the components are stored, transported and made available to the operator without interruption to the supply cycle (kanban or sequential).

TRANSTOCKER

A revolutionary storage system where the components are packed at height without recourse to stackers, increasing safety, maximising and optimising space.

Modul**Pipe**-system

A LEAN concept, modular construction system.
A versatile and reusable solution with optimum efficiency
results on logistics processes.

ModulPacking-system

System for packing and packaging which encourages the optimisation of the transport and handling of components on assembly and production lines.

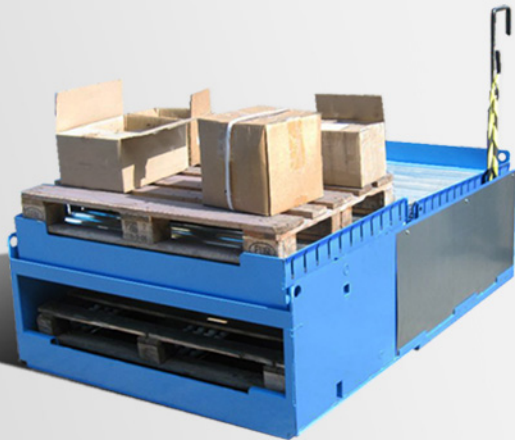

Racks and Containers

Solutions constructed around customer requirements to optimise processes and improve productivity.

Pallets Transfer

Dynamic Platform used to provide production and assembly lines with Euro pallets from 1200 x 800 mm, without interruption of the supply cycle.

INDUSTRIAL SHELVES

For heavy, medium and light loads with dynamic or static structures, fixed or mobile, we have customised solutions for the most demanding spaces.

INDUSTRIAL FURNITURE

A wide range of furniture solutions with great versatility for combining materials and tidiness solutions.
